ISEP

INTELLIGENCE. RULES.

- Unlike other intelligence sharing services that require expensive deployment of dedicated human resources, the International Shared Element Portal (ISEP) leverages the power of the entire investigative team right from their office or mobile workstation.
- Let the intelligence of all contributors drive your investigations instead of letting an investigation drive the intelligence.

"Identifying and sharing intelligence globally just entered the 21st century."

Steve Rogers, DEI

FEATURES

- Share intelligence only when ready
- Share (publish) only the intelligence you want to share
- Download (consume) intelligence any time
- Corporate intellectual property and privacy is protected
- DEI performs analysis on all intelligence for feedback to clients
- Collaborate with other contributors only when you are ready
- Publishing intelligence is a permission controlled by the OSCID client
